

**Chammas & Marcheteau advises Water Horizon on its
€18 million fundraising (Energy/Energy Transition)**

Chammas & Marcheteau advised Water Horizon on its €18 million fundraising from its historical investors — Banque des Territoires (on behalf of the French State as part of the France 2030 “Territoires d’Innovation” programme) and Delmas Investissements et Participations — as well as from Groupe EREN, a new strategic investor.

Founded in 2017, Water Horizon is an innovative player in the energy recovery of waste heat. Its “Cooling As A Service” (CAAS) technology provides on-demand cooling by harnessing local waste heat. This solution reduces both carbon emissions and energy costs in a European cooling market experiencing strong growth.

This fundraising will enable Water Horizon to accelerate its expansion in high-potential regions and strengthen its international development. In France, it will enhance the company’s territorial impact by supporting sustainable reindustrialization and contributing to job creation in local communities.

The **Chammas & Marcheteau** team consisted of **Denis Marcheteau** (partner), **Romain Penloup** (counsel), **Jeanne Cormerais** and **Nessrine Berrad** (associates).
