

**Chammas & Marcheteau advises the investors in
Kéria's €1 million fundraising (Software/Fintech)**

Chammas & Marcheteau advised the investors in connection with Kéria's (formerly Cezam) €1 million seed funding round, led by Epopée Gestion alongside Newfund and a business angel, and supplemented by a debt financing from Bpifrance, bringing the total amount to €1.5 million.

Founded in 2020, the Bordeaux-based company Kéria develops AI-powered software that analyses application files and validates real estate loans in real time, while reducing human bias associated with manual data entry.

This financing will enable Kéria to roll out its solution to a larger number of banks and real estate professionals, accelerate the deployment of its tool across the entire ecosystem, and exceed €1 million in revenue as early as next year.

The **Chammas & Marcheteau** team consisted of **Jérôme Chapron** (partner) and **Agathe Delforge** (associate).
