

**Chammas & Marcheteau advises Siemens on the  
acquisition of Aster Technologies (Industrial software/Electronics)**

---

**Chammas & Marcheteau** advised Siemens on the acquisition of Aster Technologies.

Founded in 1993, Aster Technologies is a market leader in printed circuit board assembly test verification and engineering software. The company has an international presence, notably in the United Kingdom and the United States, and serves a leading industrial client base.

This acquisition will enable Siemens to further enhance its software offering upstream of the electronic board design and manufacturing process. By integrating Aster Technologies' solutions into its existing portfolio, Siemens aims to help its customers detect defects earlier, reduce development costs, accelerate time-to-market, and improve product quality, reliability and compliance with industry standards.

The **Chammas & Marcheteau** team consisted of **Lola Chammas** (partner), **Margaux Deuchler**, **Vincent Lopez**, **Julien Delacroix** and **Flore-Maxence Le Blanc** (associates) on the M&A and corporate aspects, and of **Eric Métais** (partner) and **Capucine Vitry** (associate) on real estate law aspects.

The founders of Aster Technologies were advised by the law firm **Cornet Vincent Ségurel**.
